

## PREFERRED TIMBER SUPPLIER

### PRODUCTS AVAILABLE

#### AUSTRALIAN PINE FRAMING

**T2 Blue** - Recognised as the leading brand in termite resistant framing and guaranteed by Hyne Timber for 25 years, T2 Blue is now protecting over 350,000 Australian homes and counting

**T2 Red** - Providing termite protection North of the Tropic of Capricorn, T2 Red is leading the charge with a 25 year guarantee that provides peace-of-mind where home insurance does not.

**T3 Green Plus** - With a revolutionary new VOC free treatment that goes above and beyond the Australian standards, T3 Green Plus is uniquely suitable for both internal and external framing projects.

#### GLUE LAMINATED TIMBER (GLT)

**Hyne LGL** - When performance matters, let LGL do the heavy lifting. Beam lengths of up to 12m, excellent nail-holding capability and equally at home both indoors and out – LGL is the solid wood alternative to LVL.

**Beam 17** - The ideal alternative to steel and actually the strongest pine beam available, Beam 17 is suited to a variety of critical load and long span applications. A broad range of section sizes, treatment levels and single beam lengths of up to 16.8m are readily available.

**Beam 18** - With its natural warmth and light, consistent colouring – Beam 18 is best suited to stylish internal applications including residential and commercial environments.

**Beam 21** - With unique strength and a rich textured appearance courtesy of premium native hardwood, Hyne Timber's Beam 21 makes a bold design statement that can truly define an internal or external space.
