FAST, FLEXIBLE, POWERFUL SOFTWARE

Multinail has some of the best minds in the business working on refining and perfecting Cornerstone, their enterprise wide software solution. Among users, Cornerstone is acknowledged as a powerful productivity tool, while also being flexible, easy to use and accurate.

AUSTRALIAN DESIGNED & MANUFACTURED MACHINERY

Designed for Australian conditions and the needs of local fabricators, Multinail machinery is robust, high quality and built to last. Renowned in the industry, Multinail's world-class equipment range includes large hydraulic presses and multi-axis computer controlled saws, as well as a range of automatic, semi-automatic and manual truss jiggling and pressing systems that use a variety of hydraulic, electrical, pneumatic and computerised equipment.

NAIL PLATES

Multinail designs and manufactures a huge range of nail plates in its 5,600m² custom built production and warehousing facility. With more than 40 presses and roll form lines from 25 - 250 tonnes + 120 single operation and progression tools, Multinail processes hundreds of tonnes of coil steel per month. Multinail designs and manufactures in-house, so full quality control is maintained from start to finish.

ENGINEERING

Multinail has a dedicated and experienced team of registered structural engineers that provide detailed design services and advice to clients across the globe on Multinail's proprietary light weight pre-fabricated timber systems.

The only full package provider to the Australian frame & truss sector
