ENGINEERING

Multinail has a dedicated and experienced team of registered structural engineers that provide detailed design services and advice to clients across the globe on Multinail's proprietary light weight pre-fabricated timber systems.

SOFTWARE

Multinail has been developing detailed software programs in-house since 1980, providing clients with some of the most efficient and comprehensive solutions for the light weight pre-fabricated timber industry.

WORLD CLASS MACHINERY

Multinail Machinery has been designing, manufacturing, maintaining and exporting the machinery that powers leading fabricators across the globe since 1990.

The world-class equipment range includes large hydraulic presses and multi-axis computer controlled saws, as well as a range of automatic, semi-automatic and manual truss jiggging and pressing systems that use a variety of hydraulic, electrical, pneumatic and computerised technologies.
