

PREFERRED NAILPLATE SUPPLIER

1964 was when Pryda was formed and 55 years on, we are still supporting fabricators to develop their businesses and manufacture quality trusses and frames using easy-to-use, intelligent design and production software.

Supporting the productivity and profitability of our Fabricators is at the core of our offer. Pryda prides itself on establishing strong, longstanding relationships and delivering high standards of personalised service to suit our customers' needs.

With a team experienced in Frame and Truss across all touch points of the supply chain, Pryda is continuing to 'up the game' in the support we deliver to our customers.

With Pryda, fabricators get the best of both worlds – a seasoned Australian operator with deep experience servicing accounts of all sizes; and the backing of a global giant in parent ITW. As part of ITW, Pryda has access to a vast array of resources and expertise. This includes the ITW Technology Centre located at ITW Head office in Chicago Illinois and the expertise and experience of the Alpine (North America) and Gang-Nail (UK/Ireland) nailplate and software businesses.
