The **Pryda Australia** business has developed over 35 years to provide a diverse range of quality timber connectors, a nationwide sales and distribution network, extensive technical service capabilities and superior software and manufacturing systems support. Pryda's experienced team of professionals assist fabricators to develop their businesses and manufacture premium trusses and frames using easy-to-use, intelligent design and production software.

Pryda prides itself on establishing strong, longstanding relationships with its customers and delivering high standards of personalised service to suit the customers' needs. Pryda Australia is an autonomous division of USA-based Illinois Tool Works Inc.; a Fortune 200 diversified manufacturing company with more than 90 years of history.

Other successful brands in the ITW Australia stable are ITW Proline, Paslode, Ramset, Buildex and Reid Construction Systems. Pryda also gains valuable benefits in product, fabrication machinery and software development from its association with other ITW nailplate and timber connector suppliers from around the world.
