[gwatson@timberlinkaustralia.com.au](mailto:gwatson@timberlinkaustralia.com.au)

### TIMBERLINK AUSTRALIA

Strong yet lightweight, Timberlink framing is the ideal building material for use in domestic and mid-rise applications

- Lightweight, with a high strength to weight ratio. Easy to transport and move around site
- Structurally graded to meet Australian Standard AS1720.1:2010.
- Timberlink Green - The world's first outdoor timber to combine the proven performance of LOSP (Lightweight Organic Solvent Perservative) technology with a Low Odour formulation
- Timberlink Blue - structural framing that protects buildings from termites and European House Borers (EHB)
- Made from renewable Australian pine resources in Australia
- Timber is the world's most environmentally-friendly product, removing and storing carbon instead of adding to it as steel and concrete do
- Kiln dried for improved stability
