VEKTA AUTOMATION

Vekta Automation is a dynamic, young company specializing in quality automation for the timber truss and frame industry. Vekta provides a combination of superior technical knowledge and actual industry experience, allowing them to provide customised automotive solutions for your manufacturing plant. Vekta's innovative product range and personal services are helping Truss plants throughout Australia, New Zealand and North America improve their production, increase safety and grow their business.

Our cutting solutions centre around two primary products, the Razer V5 and S5. From there, a company can select from various options and accessories to meet both their budget and operational needs.
