

PREFERRED TIMBER SUPPLIER

Wesbeam e-joist is a lightweight, high strength, high value for money I-joist manufactured by Australia's only I-joist manufacturer from sustainable Australian plantation timber

PRODUCTS AVAILABLE

e-joist: Uses the latest engineered wood technology to create a floor and ceiling joist that's lightweight, straight and strong, easily cut and drilled with conventional tools and available in lengths up to 13.2m.

e-beam: The premier LVL product available in Australia. Has many advantages over traditional building products with longer lengths and a high strength-to-weight ratio.

e-beam+ [F17]: LVL F17 hardwood substitute which meets the requirements of all relevant Australian Standards. JD3 rating for nails, bolts and screws making it the ideal choice for floor joists or bottom chords in girder trusses.

SERVICES AVAILABLE

Design Centre: A free service for registered customers. Submit your design and in five days you'll receive a full set of working plans plus a detailed breakdown of material quantities/costs.

e-portal: Intuitive, intelligent and quick – making it easier than ever to lodge your plans with our Design Centre experts and win more business in less time.

Tech Hotline: Free, fast support from Wesbeam's technical team. Available from 9am – 5pm, the Tech Hotline gives you direct access to a Wesbeam Technical expert - 1300 356 460.
